The Power of Future

## Worldwide dependency for Best Alternate Energy 'SOLAR ENERGY'

Nature has given us SUN the ultimate & plenty of Power forever. D-Light is the way to harvest Pure & Free... Energy. We integrate the systems with major components like Solar Photovoltaic Modules of multinational brand Mitsubishi, Japan. Battery bank, Inverter etc. Depending on such advantages as stable & reliable power supply, easy installation, simply operation and maintenance, beautiful appearance and long life, the solar power system is widely applied in the world and is changing into alternative energy sources from the supplementary energy. By means of study and production of controller, inverter and photovoltaic application products, design & installation of photovoltaic systems engineering, we have accumulated rich experience and provided users with complete solar power design scheme, and a series services such as engineering design, installation, debugging and maintenance to meet different requirements of clients, to make the entire power generation system reach high efficiency and to ensure the stability and reliability of the system.

Please visit our website For more solar products we manufacture and integrate the system:
